By far the most common snake in Britain is the adder. In Scotland, in fact, there are no other snakes at all. The adder is also the only British snake with a 1.[_____] bite. It can be found almost anywhere, but prefers sunny 2.[_____] and rough open country, including high ground. In Ireland there are no snakes at all.

Most people regard snake bites as a fatal misfortune, but not all bites are serious, and very few are fatal. Sometimes attempts at emergency treatment turn out to be more dangerous than the bite itself, with amateurs heroically, but 3.[_____], trying do-it-yourself surgery and other unnecessary measures.

All snakes have small teeth, so it follows that all snakes can bite, but only the bite of the adder presents any danger. British snakes are shy animals and are far more 4.[_____] of you than you could possibly be of them. The adder will attack only if it feels threatened, as can happen if you take it by surprise and step on it 5.[_____], or if you try to catch it or pick it up, which it dislikes 6.[_____]. If it hears you coming, it will normally get out of the way as quickly as it can, but adders cannot move very 7.[_____] and may attack before moving if you are very close.

The effect of a bite varies considerably. It depends upon several things, one of which is the body 8.[_____] of the person bitten. The bigger the person, the less 9.[_____] the bite is likely to be, which is why children suffer far more seriously from snake bites than adults. A healthy person will also have better 10.[_____] against the poison. Very few people actually die from snake bites in Britain, and though these bites can make some people very ill, there are probably just as many cases of bites having little or no effect, as there are of serious illness.

I hated almost every day of my time at boarding school and, in any case, my first term was a disaster. I found it very difficult to settle down, and my unhappiness was made worse 1.[_____]. A happy home life gives you a base from which you can go into the world with confidence. But if life at home is difficult, life away at boarding-school is almost impossible. Apart from having to keep to a great many rules and customs, 2.[_____], we were never allowed to be alone. You had to be with another boy at all times. I am extremely dependent on being alone part of every day, so daily life at school was very hard for me, though the other boys managed fairly well.

In the middle of the first term I developed a cough. The school nurse said it was a 'stomach-cough', whatever that may be, 3.[_____]. However, afterwards, playing football in a snowstorm, I suddenly could not breathe properly 4.[_____] ill with bronchitis and pneumonia. Almost at once I was put into a small room with another boy who was also very ill. He died and I nearly did. My main memory of my stay at the hospital was that the night-nurses 5.[_____] and play cards and chat. Keeping the light on 6.[_____] didn't bother them. When I had recovered I was sent home for a few weeks and missed a term.

When I returned to school, I was sent to bed early because of my illness, 7.[_____]. Later on, when I went into the Senior part of the school, I was allowed to go to the school library by myself, 8.[_____].

The day I left the school, the headmaster said goodbye and asked whether it was a sad day for me. I replied that it was the happiest day of my life. He said I would come to think of my time at the school very differently. I said that 9.[_____]. Though I have had unhappy days since that day, I have found that my conclusions then - 10.[_____] - have been proved true.

- A that nothing afterwards could ever be so bad as boarding school**
- B and so managed to get a brief period alone every day**
- C because I was also unhappy at home**
- D which was a great improvement**
- E I was sure that I would not**
- F and was taken to hospital**
- G and keeping me awake when I was seriously ill**
- H many of which seemed to me stupid**
- I and gave me some pills**
- K used to get together in my room**
